

April 5, 2006

Dear Sirs;

Something of this nature terrifies me. Wal-Mart Super Centers have already brought so much misery and pain to this country. In the health care field alone, most employees do not have medical insurance unless they are covered by their state sponsored programs. So many businesses have been closed due to this giant corporation, who seems to thrive on greed and power. I regret the many times in the past that I have shopped at one of their vast number of stores. Their ruthless manner and the unconcern for humanity and the environment is beyond belief.

I respectfully plead with the board of directors of the FDIC to PLEASE attend. This is too critical to miss. Our whole way of life is threatened by this insatiable giant.

Thank you,
Gilda Francisco
